Webfont Kit Download

Webfont Kit

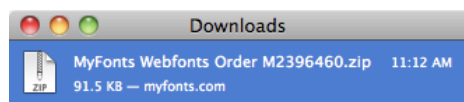

1. Save the webfont package file

The file will probably end up in the “Downloads” folder within your home folder.

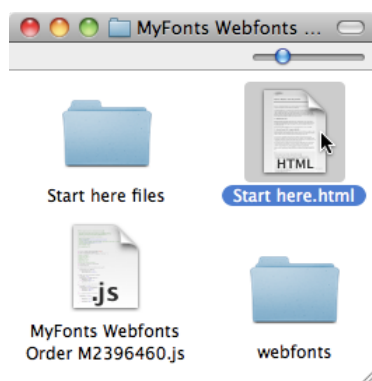

2. Open the downloaded file

If your browser shows you a Download Manager area, you can open the package straight from there by double-clicking it.

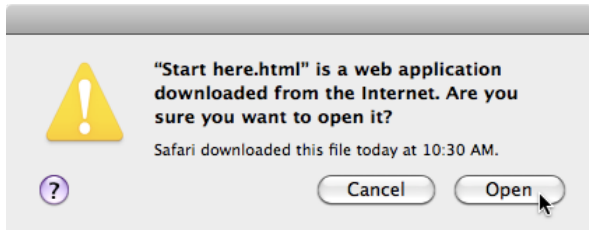

3. Take a look at the webfonts folder

This is what the webfont package looks like. Open the **Start here** HTML file for usage instructions and examples.

4. Watch for file-opening warnings

The OS may warn you that you're opening something you downloaded from the web. Click to allow.

help@myfonts.com.
